FOUNTAIN—THE MUSIC OF THE WATER

The J. L. MOTT IRON WORKS

Fifth Avenue and 17th Street
New York City

Established · · · 1828

COPYRIGHT, 1908, BY THE J. L. MOTT IRON WORKS

PLATE 537-K. HEBE

THE subjects illustrated are selected from the various branches of artistic metal work for which The J. L. Mott Iron Works have long been noted. Our record of over eighty years of continuous and successful work in this line is a guaranty of quality and of responsibility. The increasing importance that has of late years been given to the adornment of both city and country homes makes vases, fountains, entrance gates, etc., indispensable. We will send our illustrations and literature to those interested. When writing it is always advisable to give us all information possible.

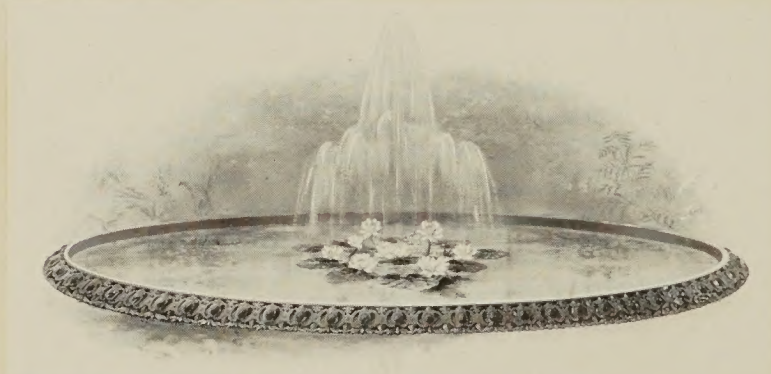

PLATE 367½-H.—FOUNTAIN—FLOATING WATER LILY

NEARLY all country places should have a water garden or basin for aquatic plants in connection with a display fountain, either small figure or group. When centrally located the water display will add greatly to the picturesqueness of the garden.

The statue of Hebe on the opposite page is the work of the sculptor Moretti.

The Greek Water Carrier, above, is a conception of the sculptor A. G. Newman.

Both statues possess grace and dignity.

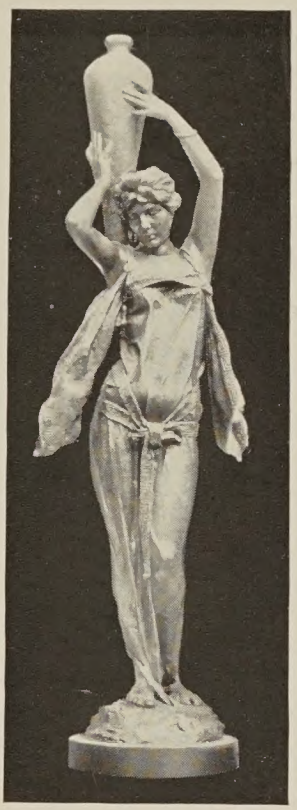

PLATE 345-H. GREEK WATER CARRIER

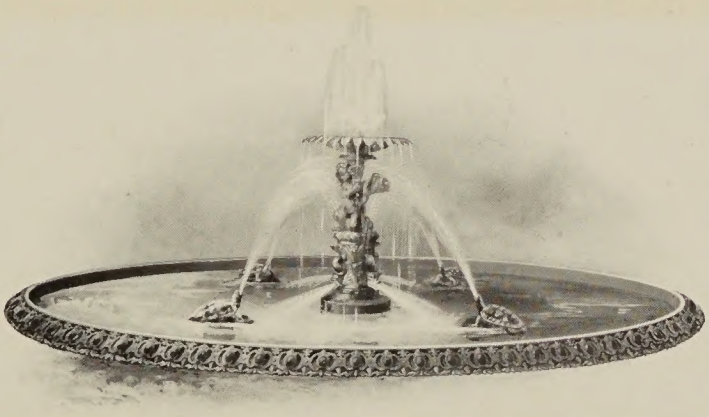

PLATE 449-H. FOUNTAIN — CUPID AND DOLPHINS — WITH TURTLES

AVERY CLASSICS AT3410 J13 1908

PLATE 370-H. FOUNTAIN — WITH BOY AND SHELL

IN the park or other public place the fountain is always a central point of interest. We have many designs of these fountains; some elaborate in themselves, others depending largely for their effectiveness upon the water display.

PLATE 249-L. FLOATING DUCK

PLATE 308-H. FOUNTAIN

AN interesting adjunct to the garden fountain will be found in the ducks, goslings, floating frogs, etc. They are in natural colors. The turtle is finely modeled from life and is arranged to throw a jet of water, if desired.

PLATE 242-L. FROG

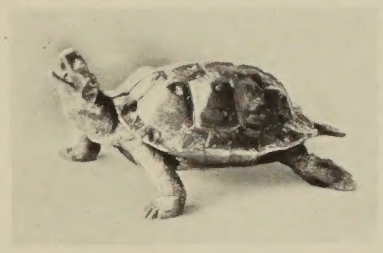

PLATE 254-L. TURTLE

LARGE DRIVEWAY GATES

THE accompanying illustration shows the entrance gates of a large estate near New York which were designed and made by us.

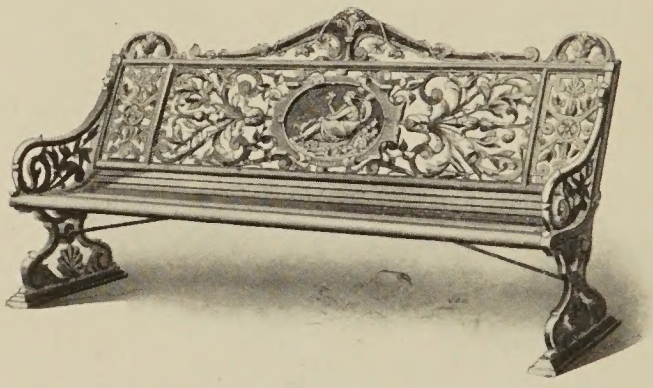

PLATE 5-D. MEDALLION SETTEE

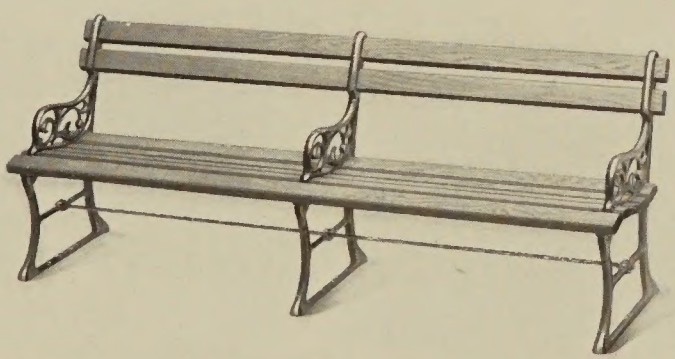
PLATE 415-N. VESTIBULE DOOR OF WROUGHT IRON AND PLATE GLASS

OUR work in wrought iron and bronze is of the very highest grade in design and workmanship.



FOUR-SEAT SETTEE

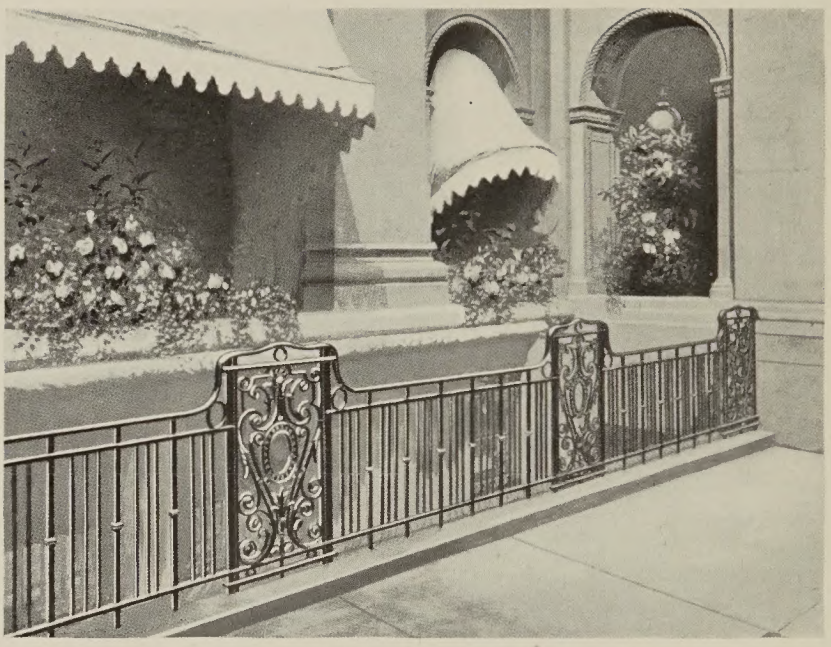


PLATE 317-N. WROUGHT IRON RAILING

WE are prepared to furnish designs for entrance gates, railings, etc., in various metals; and to execute work from architects' designs.

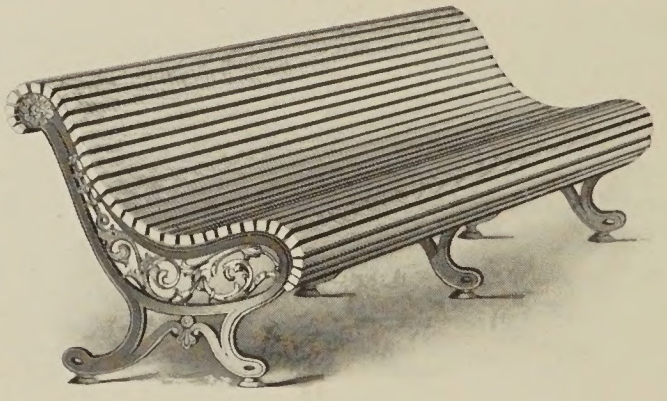

PLATE I-D. SCROLL SETTEE

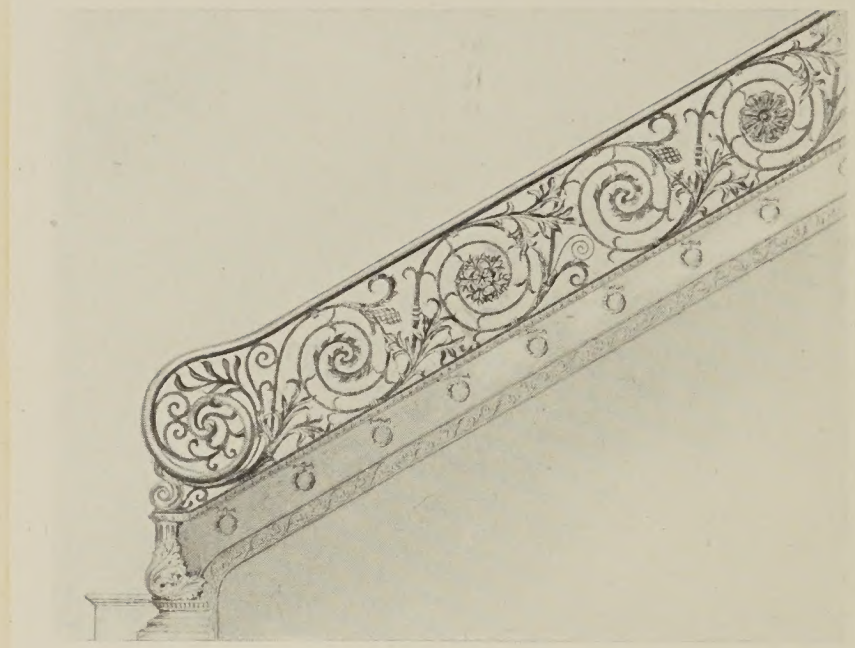
PLATE 382-N. BALCONY RAILING

WROUGHT iron work has an individuality, a personal quality that gives it a distinct place of its own in the arts.

PLATE 313-N. ENTRANCE GATES AND RAILING



WROUGHT IRON STAIR RAILING

CORRESPONDENCE relative to stair railings should be accompanied by accurate measurements.

ARC LAMP BRACKET

BISHOP'S CROOK DESIGN

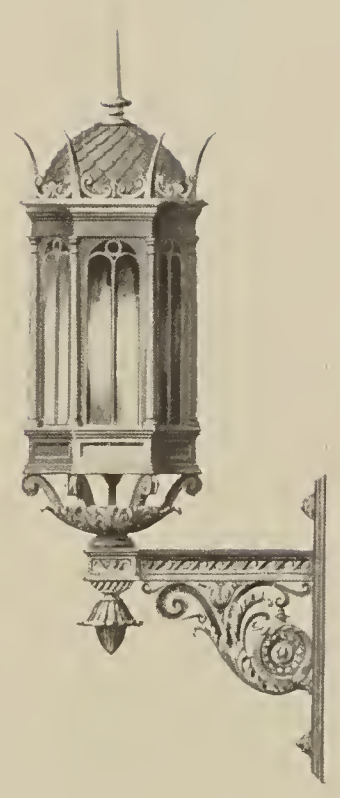

PLATE 248-J. LAMP BRACKET

WROUGHT IRON

THE electric or gas light post bears an intimate relation to the architecture of the building.

From our many designs in the various styles the owner and architect can readily make a suitable selection.

Illustrations of light posts for residences, business or public buildings and parks will be sent on request.

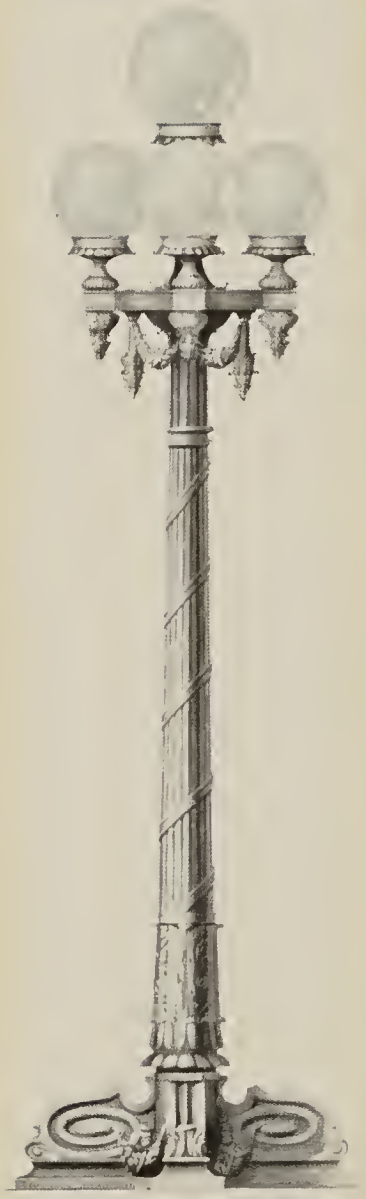

PLATE 1014-J. ELECTROLIER

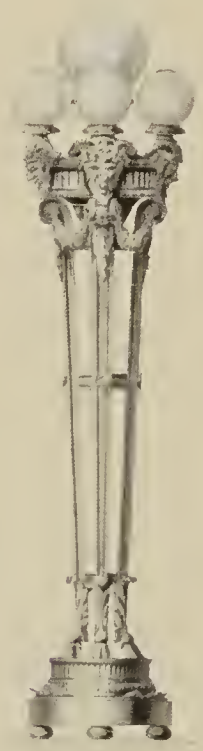

ELECTROLIER

SUPERIORITY of design and excellence of casting have placed us at the head and front in the manufacture of Ornamental Iron Work, and more particularly electric light posts and electroliers. The equipment at our Trenton works for their production is unequalled. We have designed and furnished the electroliers for many of the most prominent buildings throughout the country.

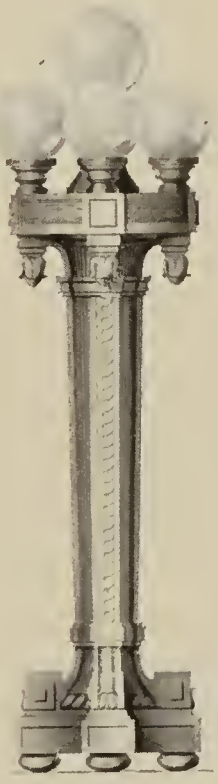

PLATE 1109-J. LIGHT POST

ARC LAMP. POLE NO. 1

PLATE 217-L. VASE

OWNERS of country places all over the world are interested in beautifying them and, of late, architects and landscape gardeners have given marked attention to the laying out of the gardens, terraces, lawns and grounds. Appreciating this fact we have successfully reproduced many of the most celebrated works of the highest artistic value, such as decorate the beautiful homes of England, Italy and France.

PLATE 208-L. VASE

THESE classical reproductions, together with many highly artistic and original designs, are part of the exhibit at our showrooms.

We shall be glad to send illustrations on receipt of information as to the size and character of the vases desired.

PLATE 219-L. VASE

We are also prepared to submit special designs and suggest new models to harmonize with the scheme of garden or house architecture.

PLATE 232-L. VASE

PLATE 207-L. VASE WITH PEDESTAL

ON the terrace, at the approach to the garden, or elsewhere in the grounds, vases with flowers, in appropriate situations, add greatly to the artistic effect.

Illustrations showing weather vanes and sun dials will be sent on application, or special ones will be made up from architects' drawings.

BOULEVARD TABLE AND CHAIR

PLATE 7-B. BRONZE DOOR FOR MAUSOLEUM

WE design and manufacture bronze doors, window grilles, catacomb handles and other bronze furnishings, especially appropriate for mausoleums.

PLATE 62-B. IDEAL HEAD IN BRONZE

DRINKING FOUNTAIN WITH ELECTROLIER

WALL DRINKING FOUNTAIN

ENTERPRISING municipalities are rapidly increasing the number of drinking fountains for animals and also for men.

We are specially equipped for work of this kind and drinking fountains of our design and manufacture are almost exclusively in use throughout the United States and South America.

PLATE 440-K. DRINKING FOUNTAIN FOR MAN HORSE AND DOG

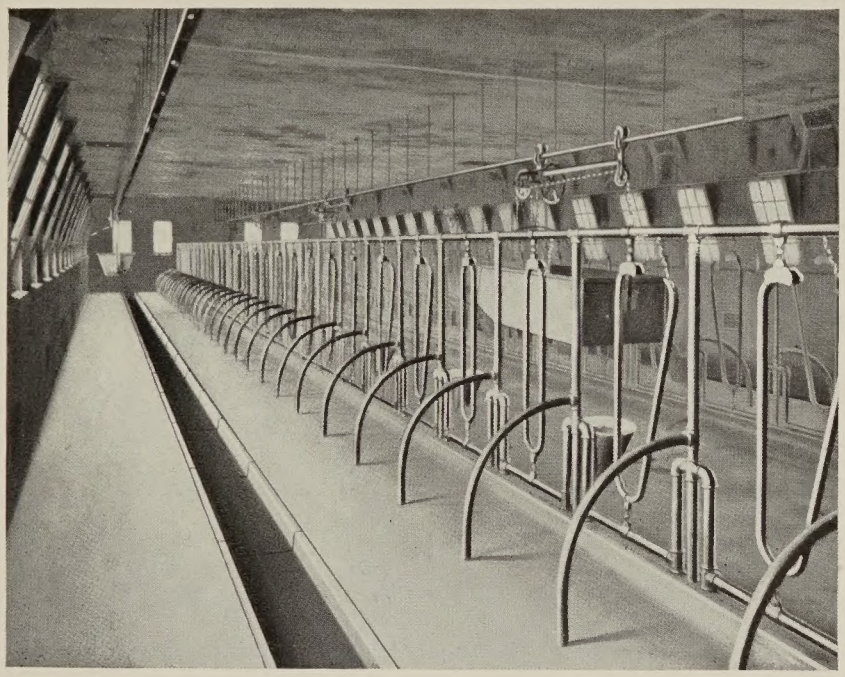
OF our large number of drinking fountains we have here selected one large ornamental one for a park or other prominent place, one smaller one for man, horse and dog; a "crystal stream" sanitary bubbling cup, and a bronze wall panel.

In each class we have a large variety of models.

PLATE 527-K. CRYSTAL STREAM DRINKING FOUNTAIN

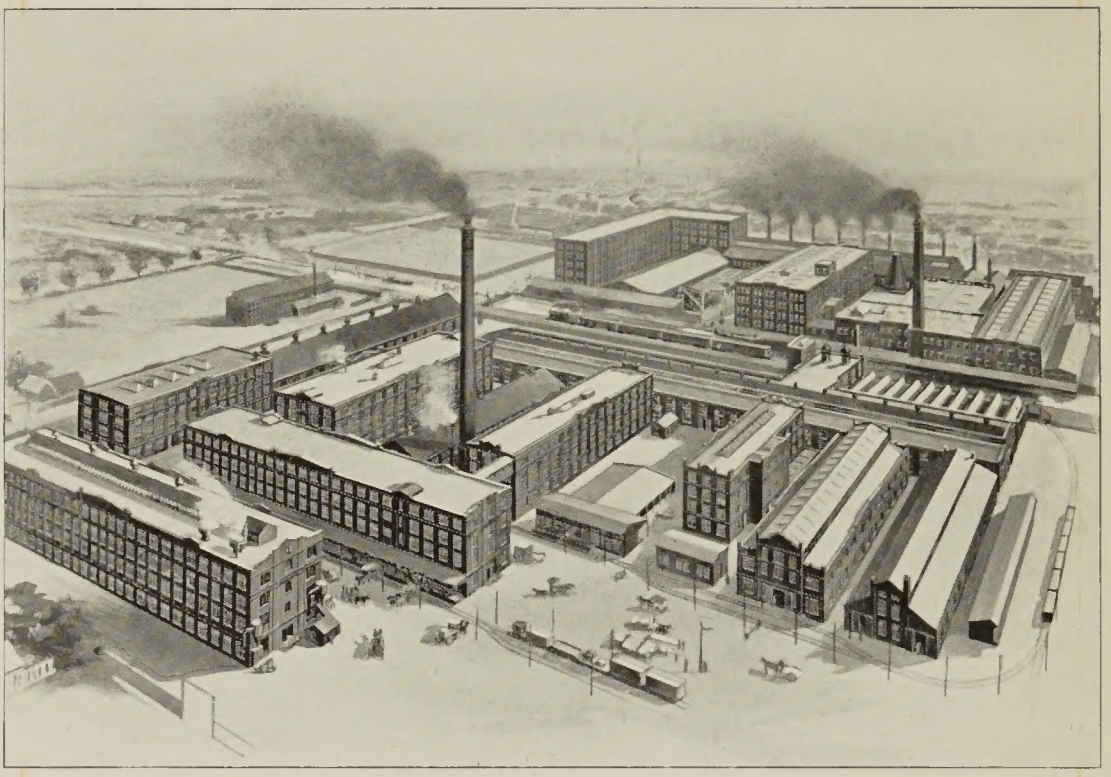
PLATE 722-S. STABLE INTERIOR

OUR stable fittings in iron, brass and bronze, non-comparable as to quality and finish, have for many years occupied the first place in all high-class work. We make a very comprehensive exhibit at our showrooms, Fifth Ave. and 17th St.



COW STABLE, INTERIOR

ABSOLUTE cleanliness is necessary where pure milk is desired. These fittings are thoroughly sanitary, durable and of approved design, and the stalls can be flushed with a hose, thereby cleaning them thoroughly and quickly. The self-watering devices shown are supplied from an automatic tank, the water in basins maintaining a uniform level. The overhead conveyors carry feed, and the manure is removed in the same way.



IN 1828 our works at Mott Haven were established. In 1894 our Potteries were established in Trenton, where, in 1907, our entire manufacturing plant was concentrated.

Not only do we manufacture all the goods we sell but we manufacture them in

ONE COMPREHENSIVE PLANT

which is undoubtedly the most complete and thoroughly equipped of its kind. No expense has been spared to get the very best results in every department, our aim being to produce goods of the highest quality in their various grades, and to do so at a reasonable cost.

AVERY
CLASSICS

OUR various branches of manufacture include the following :

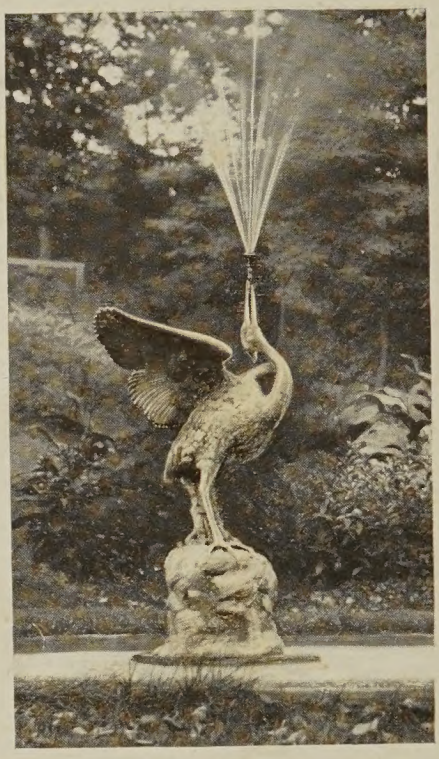
ORNAMENTAL METAL WORK

STABLE FITTINGS

FINE PLUMBING FIXTURES AND TILING FOR DOMESTIC USE AND HOSPITAL AND MARINE SERVICE

HOT WATER, STEAM AND HOT AIR HEATING

KITCHEN RANGES



Bartlett-Orr Press, New York
